## LA COMPAGNIE DES ALPES AND GREENYELLOW LAUNCH THE INSTALLATION OF PHOTOVOLTAIC CARPORTS AT PARC ASTÉRIX, FUTUROSCOPE AND WALIBI RHÔNE-ALPES

La Compagnie des Alpes (CDA), the European leader in leisure, and GreenYellow, a global leader in decentralized energy transition, are deploying an ambitious project combining solar energy production, 440 electric vehicle charging points and 2 MWh of energy storage solutions at the sites of Futuroscope, Walibi Rhône Alpes, and Parc Astérix. Aligned with CDA Group's environmental commitments, the installation of 18.6 MWp of photovoltaic parking carports will help secure energy costs and optimize the self-consumption of renewable electricity. These infrastructures will cover nearly 25% of the self-consumed electricity needs of these three parks.

With the installation of photovoltaic carports in four parking lots (P2, P3, P6, and the employee parking lot), Parc Astérix is deploying a significant infrastructure that will reach **7.6 MWp of solar energy, producing 7.1 GWh annually for full self-consumption**. The first phase of construction, set to begin in early 2026, already includes the creation of **120 charging points for electric vehicles**, with the goal of electrifying **370 parking spaces**. Additionally, the program includes an **energy storage solution** to stabilize the park's power supply during peak demand periods.

Futuroscope park, where construction began in January 2025, will benefit from **5.4 MWp of solar carports for full self-consumption**, generating an **annual production of 6.4 GWh**. In addition, **40 charging points for electric vehicles** will be deployed in 2025 as part of the partnership, strengthening the sustainable mobility offering.

Walibi Rhône-Alpes will benefit from **5.6 MWp of solar carports (a mix of self-consumption and grid injection)** with an **annual production of 6.5 GWh** and will offer **30 charging points for electric vehicles**. Construction, which also began in January, is expected to be completed by December 2025.

**Dominique Thillaud, CEO of Compagnie des Alpes:** *"The implementation of this program is part of Compagnie des Alpes' commitment to expanding renewable energy production at its leisure sites as much as possible, with similar installations at Walibi Belgium since 2023 and Bellewaerde starting in 2026. In the long run, approximately 15% of the group's total electricity consumption is expected to be covered by photovoltaic energy. GreenYellow's extensive expertise allows us to move quickly with the concrete implementation of these installations, accelerating our electricity production and self-consumption strategy. Additionally, these projects include the deployment of charging stations for electric vehicles for our amusement park visitors—a step toward reducing Scope 3 emissions."*

**Romain Butte, General Manager of GreenYellow France:** *"With this program, Compagnie des Alpes strengthens its commitment to an ambitious and economically sound energy transition. GreenYellow is proud to support this initiative by offering integrated and innovative offers across multiple occupied sites. These three projects illustrate our ability to go beyond photovoltaics by integrating in third-party investment electric vehicle charging stations and energy storage solutions, creating value for our clients."*

**Mathieu Cambet, Deputy General Manager of GreenYellow France:** *"We are delighted that La Compagnie des Alpes' trust is materializing in the rapid launch of these projects across three iconic parks and the expansion of our partnership into electric mobility and energy storage. These perfectly complementary solutions enhance our overall third-party investment offering."*

## ABOUT GREENYELLOW

GreenYellow, a French company founded in 2007, has become in 18 years a major player in the energy transition in France and internationally, and a true partner of corporates and local authorities in their decarbonization journey and quest for energy independence.

As an expert in decentralized solar photovoltaic production, energy efficiency programs, energy storage, and electric vehicle charging infrastructure, GreenYellow supports its clients across the entire value chain. The group ensures the study, financing, development, and operation of assets that allow them to produce green, local, and competitive energy, reduce their energy consumption, while strengthening their competitiveness.

In 2024, the projects carried out by GreenYellow helped avoid the emission of 545,700 tons of CO<sub>2</sub> equivalent. The group also aims to achieve carbon neutrality ("Net Zero") for scopes 1 and 2 by 2040.

Operating in 15 countries across 4 continents, GreenYellow innovates by constantly enriching its unique and global platform of offers to support corporates in their transition to a more sustainable energy model and meet the challenges of climate change.

#### ABOUT LA COMPAGNIE DES ALPES

As a major player in the leisure industry, Compagnie des Alpes (CDA) has been shaping the leisure experience for millions of people throughout Europe for over 35 years.

**Our goal? To enable everyone to reconnect with themselves and with others by experiencing exceptional moments in extraordinary places.**

Regularly rewarded for the quality of its offering and the unique concepts it develops, CDA innovates to surprise and delight its customers.

Today, CDA has 6,840 employees, 10 of the finest mountain resorts in the Alps, 12 renowned leisure parks, outdoor mountain activities, the co-leader in 5-a-side soccer and the leader in padel... It is also the number 1 real estate network in the Alps, the number 1 French mountain tour operator, and the 2<sup>nd</sup> largest operator of club residences and vacation villages in the French Alps.

Concerned with the balance of the regions in which it operates, CDA acts both in favor of their vitality and quality of life, and as a driving force behind the ecological transition. The Group believes in the virtues of dialogue with its stakeholders and respect for local and regional specificities. It therefore channels its capacity for innovation into the search for tailor-made or scalable solutions, to preserve these extraordinary spaces over the long term. The Group is committed to achieving Net Zero Carbon (scope 1 and 2) by 2030.
