

Dreame Rings Debut at Château de Chantilly in France, Opening a New Chapter of Pre-sales in Europe and Global Cooperation : France, May 27, 2026—Dreame Technology, a global leader in smart home appliances and health technology, held the launch event of Dreame Sphere at the Château de Chantilly in France. The event aimed to showcase Dreame's expanding lineup of smart technology products, delivering an

ultimate experience of smart hardware to global users.

At the launch ceremony, Dreame unveiled two star models of its smart rings: the Dreame Smart Ring and the Dreame Glow Ring. These two products bring dual major opportunities of investment cooperation and regional distribution to the global market.

The Dreame Smart Ring is equipped with an ultra-miniature precision vibration motor, supporting heart rate measurement, sedentary reminders, as well as incoming call and message alerts. Users can perceive health and life signals right at their fingertips.

The Dreame Glow Ring enables 24/7 continuous measurement of heart rate, blood oxygen, body temperature, respiratory rate and sleep structure, while providing efficient sleep analysis and activity tracking.

To date, the products have won prestigious international awards, including the 2026 French Fashion Awards, 2026 CES Wearable Awards, and 2026 International Design Excellence Awards, with market popularity surging steadily.

Pre-orders for Dreame Smart Rings have officially opened across the European market, alongside the opening of global investment cooperation talks and distributor registration channels. Going forward, Dreame Technology will continue to deepen its presence in the smart wearable sector, launch more innovative products, optimize its global footprint, create greater value for partners, and bring a superior smart life experience to users worldwide.
